What width lanes would you prefer in the competition pool? There will be at least 8 lanes that meet the USA Swimming requirement of 7ft width, but in a 30m pool we have the option for the other lanes to be narrower to increase the number of individual lanes available to the community. The pool can have either all 7' width lanes totaling 14 lanes, all 8' width lanes totally 12 lanes, all 9' width lanes totally 10 lanes, or have a combination. For example, if we have (8x) 7' width lanes, the remaining lanes could be 5' width totally 16 lanes.

ANSWER CHOICES	RESPONSES	
All lanes should be 7' width = 14 total lanes	27.82%	503
All lanes should be 8' width = 12 total lanes	16.48%	298
All lanes should be 9' width = 10 total lanes	4.81%	87
Combination to maximize number of lanes	50.88%	920
