

# Fernside Boulevard pipeline replacement

EBMUD crews are installing a new pipeline to improve water service in your neighborhood. Beginning September 26, 2016 we will be working on Fernside Boulevard between High Street and Thompson Avenue in Alameda. We expect to complete pipeline installation by January 2017 with final paving to follow.

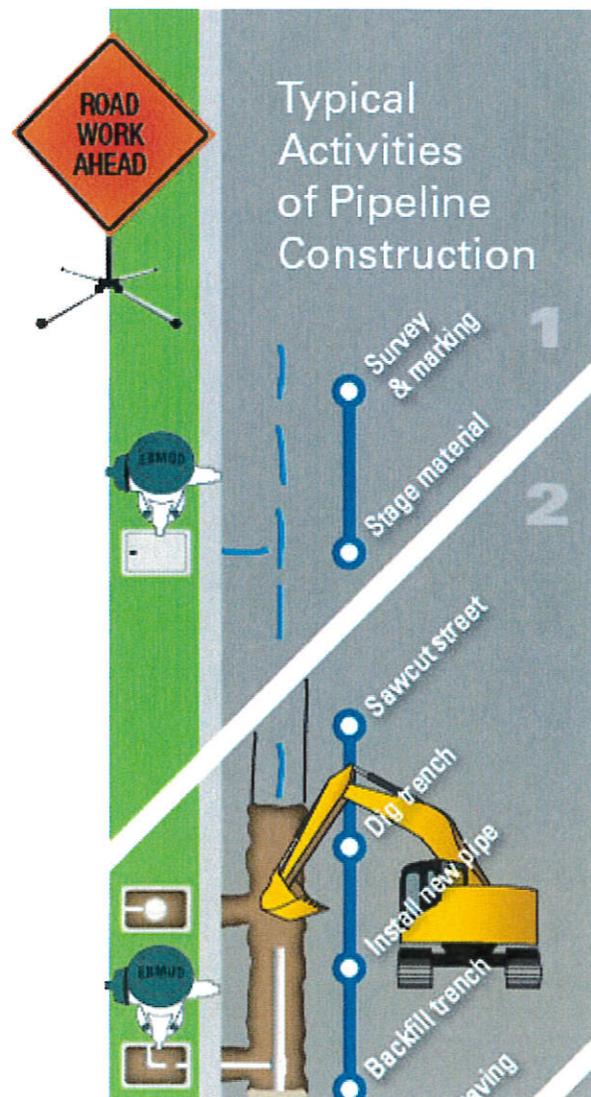

## What to expect during construction

Equipment and materials will be temporarily located in your neighborhood during construction. After installation of the new water pipeline, crews will transfer water services, install fire hydrants and make final connections. Once construction is completed, material and equipment will be removed within 1 to 2 weeks.

## Schedule

Work hours are 8:30 a.m. to 4:30 p.m., Monday through Friday. We will provide traffic control, but residents may experience ten minute delays when entering and leaving the work area. If you have special needs, please call us and we will make every effort to accommodate you.

## Water service interruption

Crews will notify you, in person or with a door hanger, regarding any planned water service interruption to your property. After a service interruption, there may be air in the pipes that may loosen particles in your home plumbing. Close your toilet water supply valves, and then run water from your front hose bib, bathtub and/or cold water faucets for 1-3 minutes. This will dispel any air or loosened particles from your household pipes. If any water quality issues remain after flushing, please call us.

## Paving and street surface

The asphalt paving applied daily is temporary and designed to provide a safe road surface during construction. Final paving will occur after pipeline work is completed. It may take up to 30 days or longer before final paving is complete.
